What is Fortune Flow?

A smart, data-driven feedback & loyalty kiosk that captures customer sentiment, visualizes data, and rewards customer engagement with symbolic fortune cookies and customized receipts.

Designed for use in Chinese restaurants.

Sentiment Trend

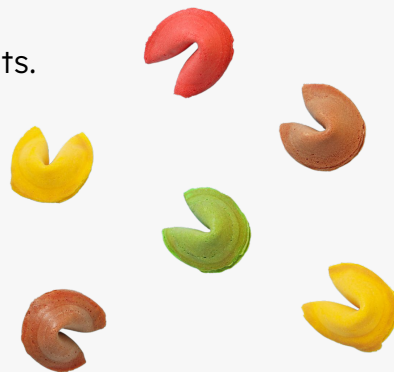

Business Dashboard

Thank you for your feedback!

Suggested tip: 20%
Your fortune cookie is being dispensed with a message of gratitude!

Tech Flow

Cirkit Designer

External power supply note

Wireless connection note for the bluetooth printer

Raspberry Pi 4
Acts as the central controller for the entire system
Provides power (5V) to the servo motor
Controls the servo motor through GPIO18 (PWM pin)
Manages the wireless communication with the Bluetooth printer
Runs the software that coordinates all components
Handles the logic for when to dispense rewards and print messages

Demo

“I want to build rapport
with my favorite shops”

Product Ideation

- Modular countertop kiosk (easy installation)
- Simple trigger via mic or a modern touchscreen
- Dispenses custom fortune cookies based on sentiment
- Customized branding for restaurants

Scalability

- Low Production Cost: \$50 - \$70
- Real-time insights are more valuable than star ratings
- Reduces decision fatigue and makes tipping a part of the interaction
- Expandable across cultural spaces

Customer Case Study

Address: Shop 7/8 Bourke St,
Mascot NSW 2020,
Australia

Within the first two weeks of installing Fortune Flow, Mr Lei received 136 feedback entries, saw a 15% increase in customer engagement, and staff began using sentiment reports as part of their weekly morale meetings. Several customers even posted their fortunes online, which helps boosting local visibility.

Thank You

And Q&A Time

Business-Facing

A dashboard for the business to view the sentiment trends among their customers.

Scenarios

Designed for point-of-sale environments such as cafes to foster less transactional checkout experience and increase customer engagement.

Tech Stack

It offers AI-generated messages, feedback storage, and visualization tools

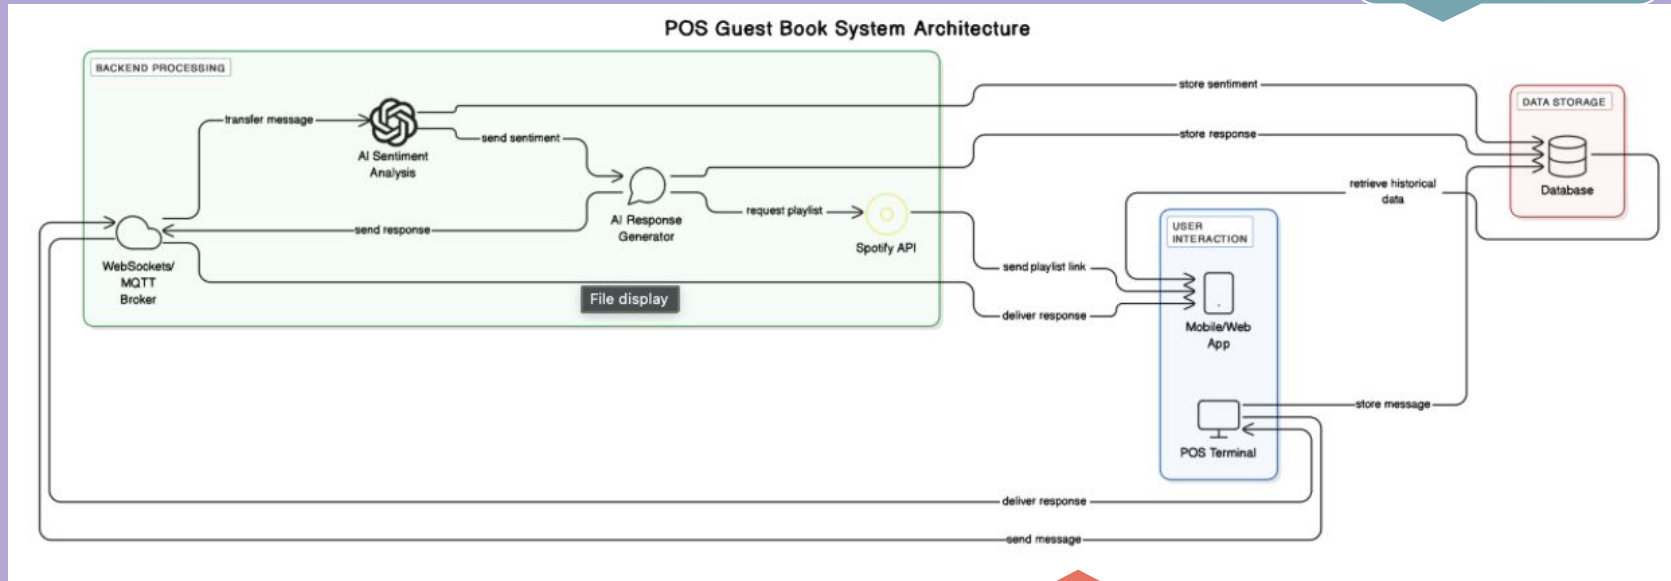

Customer-Facing

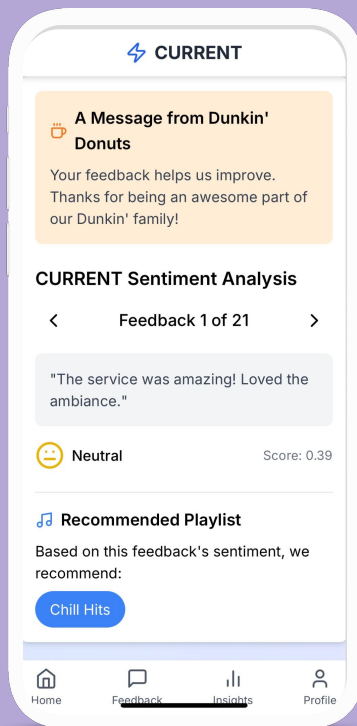

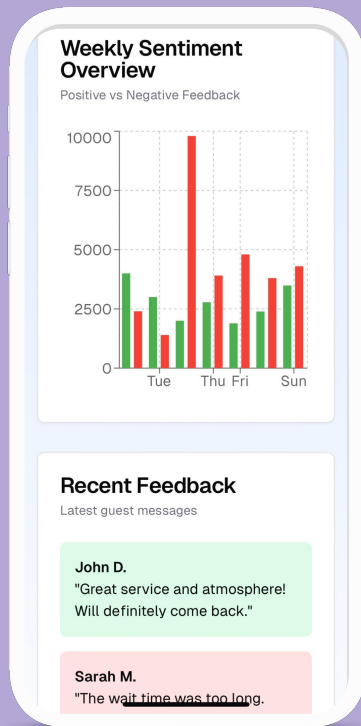

Customers can submit their feedback and share their dining experiences through the digital kiosk or mobile app prompted upon wifi connection.
